BEEDS

Texture Synthesizer

RRP £269

Wholesale £145

BLACK

WHITE

Beeds is a reinvention of the classic granular texture synthesizer: live granular processing of an incoming audio signal, redesigned from the ground up for a crisper, broader sound palette, more control and better playability. Higher audio quality, a longer buffer and better interpolation open up new territory: formants, wavetables, hard-sync-like sounds and crispy noise. Every parameter has a dedicated knob, and with no audio input Beeds granularizes eight internal banks of wavetables.

FEATURES

— Latched, gated and clocked grain generation with V/Oct tracking
— TIME, SIZE, SHAPE and PITCH grain parameters, each with an attenurandomizer
— Four quality modes: 48kHz 16-bit, Clouds emulation, hi-fi, and cassette emulation
— Stereo I/O with automatic level detection and mono/stereo patch detection
— 4s to 32s recording buffer with FREEZE and auto-saved freeze buffer
— Built-in delay mode with tap tempo, beat slicing and pitch shifting
— Independent feedback, dry/wet and reverb controls
— All-metal potentiometers
— Based on Mutable Instruments Beads
— FR4 fibreglass panel

SPECIFICATIONS

SKU	EUR-BED-BLA (Black) · EUR-BED-WHI (White)
Format	Eurorack
Width	14HP
Depth	25mm
+12V Current	100mA
-12V Current	10mA

STOCKING & AVAILABILITY

Factory assembled PCB & SMT, THT hand finished and calibrated in Edinburgh, Scotland. Brand New. Ships tracked and insured within 1 business day. Enquiries: **eastcoastmodular.co.uk**
