

# CIRRUS

Texture Synthesizer

**RRP £179**

Wholesale £100

BLACK

WHITE

Cirrus is a granular texture synthesizer built on the legendary Clouds architecture. Capture, freeze, and reshape audio into evolving granular textures — from ethereal ambience to dense, saturated soundscapes. Granular reverb, pitch shifting, time stretching, and abstract texture generation — one of the most iconic effects in Eurorack.

## FEATURES

- Real-time granular processing with multiple simultaneous grains
- Position, Size, Pitch, Density and Texture controls
- Stereo in and out with blend control
- Freeze input to capture and loop audio indefinitely
- Multiple alternate firmware modes available
- FR4 fibreglass panel

## SPECIFICATIONS

Format	Eurorack
Width	18HP
Depth	25mm
+12V Current	120mA
-12V Current	10mA
