

MONSOON

Texture Synthesizer

RRP £189

Wholesale £100

BLACK

WHITE

Monsoon is a granular texture synthesizer that captures audio and transforms it into shimmering clouds of sound. Feed it anything — a drone, a voice, a drum hit — and it returns a lush, evolving texture. From subtle reverb-like effects to completely alien soundscapes. Granular reverb, pitch shifting, time stretching, or abstract texture generation.

FEATURES

- Real-time granular processing with up to 8 simultaneous grains
- Position, Size, Pitch, Density and Texture controls
- Stereo in and out with blend control
- Freeze input for capturing and looping grains indefinitely
- Multiple alternate firmware modes available
- FR4 fibreglass panel

SPECIFICATIONS

Format	Eurorack
Width	18HP
Depth	25mm
+12V Current	120mA
-12V Current	10mA
