WRINGS

Modal Resonator

RRP £169

Wholesale £100

BLACK

WHITE

Wrings is a modal resonator — a full-size take on one of the most musical synthesis architectures in Eurorack. Feed it a trigger or audio signal and it responds with rich, acoustic-modelled tones: strings, bells, bowls, membranes, and everything in between. From plucked melodic lines to sustained resonant drones, all in 14HP.

FEATURES

— Three resonator models: Modal, Sympathetic Strings, Modulated/Inharmonic
— Polyphony: up to 4-voice chord mode
— V/Oct, Frequency, Structure, Brightness and Damping controls
— Strum and In inputs for excitation
— Odd and Even harmonic outputs
— Based on open-source Mutable Instruments Rings firmware
— FR4 fibreglass panel

SPECIFICATIONS

SKU	EUR-WRI-BLA (Black) · EUR-WRI-WHI (White)
Format	Eurorack
Width	14HP
Depth	25mm
+12V Current	120mA
-12V Current	5mA

STOCKING & AVAILABILITY

Factory assembled PCB & SMT, THT hand finished and calibrated in Edinburgh, Scotland. Brand New. Ships tracked and insured within 1 business day. Enquiries: **eastcoastmodular.co.uk**
